International Journal of Industrial Ergonomics, 11 (1993) 351–352
Elsevier

Contents volume 11

Volume 11, No. 1 (January 1993)

J.P. Frantz and J.M. Miller
Communicating a safety-critical limitation of an infant-carrying product: The effect of product design and warning salience 1
C.A. Hamrick, K.M. Cornelius, E.W. Rossi and R.L. Unger
Appropriate ingress/egress dimensions for mobile underground mining equipment 13
V. Putz-Anderson and T.L. Galinsky
Psychophysically determined work durations for limiting shoulder girdle fatigue from elevated manual work 19
T.E. Bernard and M.F. Foley
Upper acceptable surface temperature for prolonged hand contact 29

Review article
J.C. Duchon and T.J. Smith
Extended workdays and safety 37

Case study
W.M. Keyserling, M. Brouwer and B.A. Silverstein
The effectiveness of a joint labor management program in controlling awkward postures of the trunk, neck, and shoulders: Results of a field study 51

Short communication
A. Mital, S. Anand and M. Nalgirkar
Point representation versus solid representation of limb mass and its effects on the moment at a joint 67

News 73

Volume 11, No. 2 (April 1993)

Editorial i
Strategies for prevention of work-related musculoskeletal disorders: Consensus paper 77
E.R. Hoffmann, W.A. Macdonald and G.C. Almond
Quantification of the cognitive difficulty of mail sorting 83
C. Kolski and P. Millot
Problems in telemaintenance and decision aid criteria for telemaintenance system design 99
J.H. Goldberg, B.K. Leader and C. Stuart-Buttle
Medical logging and injury surveillance database system 107
C. Kolski and M. Duribreux
Towards explicit consideration of time in cognitive engineering workbenches for "intelligent" assistance system design . . 125
M.J. Simmonds and S. Kumar
Health care ergonomics. Part I: The fundamental skill of palpation – A review and critique 135
M.J. Simmonds and S. Kumar
Health care ergonomics. Part II: Location of body structures by palpation – A reliability study 145

Focus
V.M. Munipov
Ergonomics and labour protection in the USSR and the Commonwealth of Independent States – Historical landmarks and present status 153

News 163

Announcement 167

Volume 11, No. 3 (June 1993)

Special issue: 'Carpal Tunnel Syndrome', edited by Andris Freivalds

A. Freivalds
Preface 171
F. Tayyari and J.T. Emanuel
Carpal tunnel syndrome: An ergonomics approach to its prevention 173
S. Tanaka and J.D. McGlothlin
A conceptual quantitative model for prevention of work-related carpal tunnel syndrome (CTS) 181
M.S. Hallbeck and D.L. McMullin
Maximal power grasp and three-jaw chuck pinch force as a function of wrist position, age, and glove type 195
R.W. Schoenmarklin and W.S. Marras
Dynamic capabilities of the wrist joint in industrial workers 207
R.R. Bishu, W. Wang and A. Chin
Force distribution at the container hand/handle interface using force-sensing resistors 225
C. Lin, J.H. Goldberg and A. Freivalds
A non-exoskeleton optoelectric wrist goniometer 233
H. Linderhed
A new dimension to amplitude analysis of EMG 243
D. St. John, F. Tayyari and J.T. Emanuel
Implementation of an ergonomics program: A case report 249
M.T. Fogleman, A. Freivalds and J.H. Goldberg
An ergonomic evaluation of knives for two poultry cutting tasks 257
M. Lindberg, K. Frisk-Kempe, H. Linderhed and J. Eklund
Musculoskeletal disorders, posture and EMG temporal pattern in fabric-seaming tasks 267

News 277

Volume 11, No. 4 (July 1993)

D. Masset, J. Malchaire and M. Lemoine
Static and dynamic characteristics of the trunk and history of low back pain 279
G. Parenmark, A.-K. Malmkvist and R. Örtengren
Ergonomic moves in an engineering industry: Effects on sick leave frequency, labor turnover and productivity 291
K.S. Park and B.-h. Ahn
A multiple logistic function for pilot trainee selection 301
R. Myung, J.L. Smith and T.B. Leamon
Subjective assessment of floor slipperiness 313
N.J. Dawson, P.M.N. Hill and S.J. Legg
Test of a quick-don wet immersion suit for off-shore use 321
M. Authier and M. Lortie
Assessment of factors considered to be important in handling tasks by expert handlers 331

Case study
R. Neese and S. Konz
Vibrometry of industrial workers: A case study 341
